REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: While it is known in the art to provide a tank having a bottom and interior side walls, an inlet for receiving fluid, a baffle having a bottom, sidewalls, and a port through the baffle connected to the sidewalls of the tank, and a weir (see US Pat No 6,241,881 to Pezzaniti), and it is known to position a baffle above the bottom of the tank (see US Pat No 3,385,444 to Dufournet), and it is known to provide a separator with a weir having bypass functions under high-flow conditions (see US Pat No 6,077,448 to Tran-Quoc-Nam et al.), in the examiner's opinion, the prior art fails to teach or fairly suggest the aggregate of the known elements positioned and operated in the manner recited in the claims in combination with inlet flow control and outlet flow control means on the second side baffle wall. The instant invention provides the advantages disclosed on page 3, paragraph 9 of specification.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
